EDUCATION

InterMediate
Jinnah Govt College
2021-2023

MERN Stack Development
Saylani Mass IT Training (SMIT)
2022-2023

EXPERTISE

HTML , CSS , Javascript(ES6)

React JS

Next JS

Vue Js

Redux Toolkit

Node JS , Express Js

Mongo DB , MySql

Bootstrap ,
Taliwind CSS ,
Material UI ,
Framer Motion

My Projects

SMSF Stratigiest
Full Stack Application

Chat Bot (OpenAi)

Successfully developed a project as an SMSF strategist, where I created a chatbot with the help of AI. This project demonstrates my proficiency in using AI to enhance user interaction and automate responses, highlighting my expertise in integrating technology solutions for strategic purposes.

GitHub Users Finder
React JS & API

SMIT Assignment

I developed a Git user finder tool, showcasing my skills in software development. This project streamlines the process of locating users on Git, in programming and problem-solving. It reflects my commitment to innovation in collaborative coding projects

E-Statement
Full Stack Application

Bank Islami Project

I developed a comprehensive software solution for Bank Islami as a Full-Stack Developer, leveraging the MERN stack (MongoDB, Express.js, React.js, Node.js). From concept to deployment, I designed and implemented a robust application that streamlines banking processes and enhances user experience. This project reflects my ability to integrate innovative solutions with a strong focus on user interface and back-end efficiency. By staying current with technology trends, I ensured the application is scalable, secure, and aligned with the bank's strategic objectives. This experience further solidified my expertise in full-stack development and my commitment to delivering high-quality software solutions.

Work Experience

- **I worked as a Front-End Developer at Xfinitive for one year, where I focused on developing and maintaining responsive web applications. In this role, I collaborated with cross-functional teams to deliver successful projects, writing clean and efficient code in HTML, CSS, and JavaScript. I also enhanced my skills in React.js, Node.js, and MongoDB. Currently, I am working at Avrio Global as a Full-Stack Developer, where I have been employed for the past six months. In this position, I am responsible for both front-end and back-end development tasks, contributing to the entire development lifecycle of web applications. This role has allowed me to further develop my skills in full-stack development and broaden my expertise in integrating various technologies to create dynamic and robust web solutions.**
